

**REISSUE APPLICATION DECLARATION BY THE INVENTOR**

Docket Number (Optional)

31132.59

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 5,865,846, granted February 2, 1999 and for which a reissue patent is sought on the invention entitled Human Spinal Disc Prosthesis,

the application of which

☐ is attached hereto.☒ was filed on February 2, 2001 as reissue application number 09/776,394

and was amended on multiple previous dates  
(If applicable)

I have reviewed and understand the contents of the above-identified application, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

This is a broadening reissue, the nature of which involves the presentation of new claims that are broader, in at least some respects, than the methods of claims 4, 8, and 9 of the patent. One error on which the reissue is based is that independent claim 4 unnecessarily included the steps of removing a vertebral disc from a patient's spine, forming holes at predetermined locations, tapping the holes, and threadably implanting an anchor. These unnecessary limitations are omitted from new claim 12. An additional error on which the reissue is based is that the methods of claims 4, 8, and 9 could be construed as using overly limiting "step plus function" language under 35 U.S.C. 112, para. 6, which is unnecessary to render the subject matter patentable over the art of record. New independent method claims 12 and 36, for example, refrain from the use of "step" language.
